

RAY has evolved from an automated Post Office kiosk to a total convenience terminal that provides a variety of convenient services in building foyers, shopping malls and residential areas. In addition to traditional Postal services, RAY has the capability to integrate delivery solutions for a range of providers like laundry and food delivery.

RAY is the only locker box that integrates with a state of the art dimensional scale followed by label printing and dispatch.

RAY[®]
Smart Post

RAY is a total convenience terminal developed for Post and Parcel service providers. RAY is a second generation parcel locker box that offers additional services to its user. As an unmanned post and parcel terminal, RAY is a revenue generating solution for organisations looking at improving footfall while cutting down on operational cost.

RAY's user interface can be enabled to provide the following services to a customer:

- **Payment services** : Utility, home services, mobile bills, pre-booked tickets, etc.
- **Recharge services** : Pre-paid mobile, travel card, etc.
- **Ticket sales** : Cinema, performance or general ticket sales.
- **Advertising** : Location based marketing services
- **Last minute deals** : Location based deals like food discount vouchers, etc.

As a fully modular solution, RAY can be retrofitted on site, depending on the local market needs.
