BLUECREST™

The Pulse™ inserting system

Maximise your short-run efficiency.

Ideal for transactional mail operations, the **Pulse inserting system** is an **innovative, new approach to improve accuracy and efficiency** for **short-run** and **manual jobs**.

Accuracy

Featuring **high volume cut sheet input** and **optional file-based processing** for increased accuracy.

Simplified management of **30+ US Compliance regulations**

Automated Document Factory – Consistent reporting processes ensure superior accuracy for all size jobs

ROI

Faster changeovers through automation.

Average job size can be as low as **30 pieces within a run**. **Save time** with the ability to do **100+ changeovers** a day

Automate manual areas and **move small jobs** off production inserters

Flexibility

Productivity meets flexibility. The Pulse inserting system **combines industry-leading capabilities** on a **compact multi-format platform**.

Accumulates sets up to **½ inch**

Manual + automation - Hand-feed station combines the best of both processes
